Sub B3  
11. (Amended) A system for administering private keys for a plurality of users, comprising:

computer readable storage means and

a server,

characterized in that: [there is stored]

A1  
the storage means includes therein respective IDs and encrypted private keys for the respective users which private keys have been encrypted using respective keys determined from respective user identifying information, and

the server is configured:

to read an encrypted private key from the storage means associated with an ID corresponding to a particular user and

to transmit the encrypted private key to the particular user.
